Garets Sp.

case studies

Garets - about

Garets Sp. z o.o. is the official Polish importer and distributor of one of the world's leading providers of integrated solutions for electro-acoustics - Sennheiser Communications. The company, established in April 2004, provides a wide range of acoustic products: wired and wireless microphones, headphones, monitor systems, information and conference systems. In addition, the manufacturer has been developing products for the aviation and audiology researches.
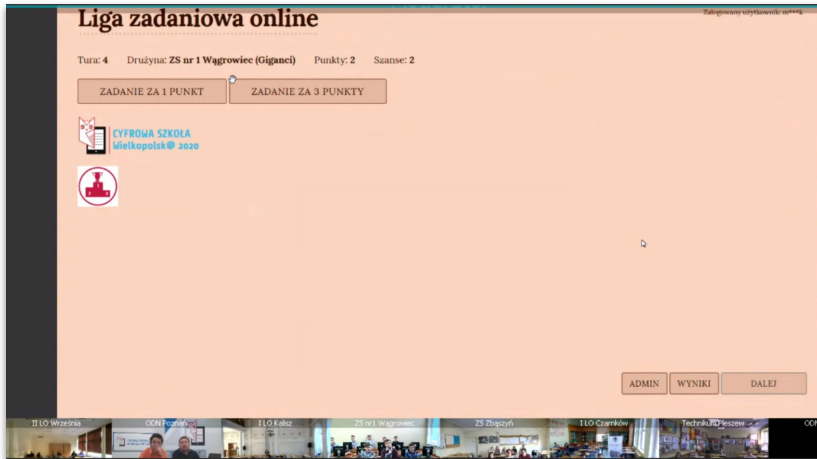

Digital School of Wielkopolska

CYFROWA SZKOŁA
Wielkopolsk@ 2020

The "Digital School of Wielkopolska" project is directed to over 11,000 (eleven thousand) students and 5,000 (five thousand) teachers from 600 (six hundred) schools from Wielkopolska. The main goal of the project is the development of digital competences for teachers and students from Wielkopolska. The video conferencing system TrueConf Server was used for distance learning and transmissions of conferences for students and teachers. Two sub-projects were implemented through a video conference system in 2018.

Digital School: Subject Leagues

Subject Leagues - competition for school teams in four categories: mathematics, physics, history and English. In each category, 24 teams from various high schools from all over Wielkopolska participated.
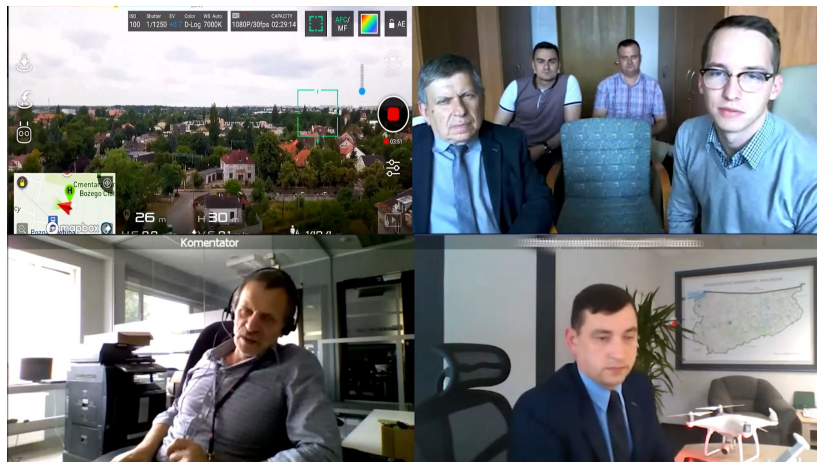

Digital School: Academic classes

Academic classes - remote lectures
carried out by lecturers from
University of Adam Mickiewicz
University in Poznan for high school
students.

Wielkopolska Voivodeship Office in Poznań

Poland is divided into 16 regions. Regions are divided into districts. The Wielkopolskia region has 35 districts. The Voivodship Office in Poznań uses the TrueConf video conference system to communicate with representatives of districts in case of natural disasters: drought, floods, fires. They attach drone transmissions to show the situation to video conference participants in real time.
